AMRITADARSHAN
*- A portrait of the creative minds -
E-literary journal*

Editorial.....

Greetings fellow readers...

Extremely happy to present the latest edition of

'Amritadarshan' - e-literary journal. Amritadarshan reveals the talents of our budding artists through their articles, poetries, paintings, etc. May these little embers of thoughts create sparks in your minds too. Without further ado, we present 'Amritadarshan' with a beautiful message of hope.

Wishes
Our Beloved Amma

**HAPPY
BIRTHDAY**

Our school celebrated the 69th birthday of
MATA AMRITANANDAMAYI DEVI.
The day was a down pour of joy & bliss. In a special assembly, our students paid a loving b'day wish to Amma with 69 lighted diyas. Keerthanams were sung and sweets were distributed to our students & staff.

Building India's Pride: The Statue of Unity

The Statue of Unity is a statue of Indian statesmen and independence activist Sardar Vallabhai Patel. Also known as 'The Iron Man of India', he is a person who guided the integration of India by bringing 562 princely states together and thus shaping the current borders of India to a large extent. In the year 2018, the world's tallest statue, 'The Statue of Unity' has been created as a tribute to the 'Iron man of India'.

Standing at 182 feet, the statue on the Sadhu Island in the Narmada district of Gujarat, was dedicated to Patel for his exemplary work. The statue is a three-layered structure built to withstand winds and earthquakes. The Statue of Unity is broadly divided into 5 zones, out of which 3 are accessible to general public. These zones include a memorial garden and museum, an exhibition area, and viewing gallery that can accommodate 200 visitors at a time.

The project was first announced in 2010, and the construction of the statue started in October 2013 by an Indian Company called L&T. It employed over 3000 workers and 250 engineers in the statue's construction. It was designed by Indian Sculptor Ram V. Sutar and was inaugurated by the Prime Minister of India, Sri Narendra Modi on 31 October 2018, the 143rd anniversary of Patel's birth.

IMPORTANCE OF LITERACY

Educated and skilled citizens are a nation's asset. Literacy helps a nation in economic, scientific and cultural progress. It also helps in wiping the social evils. Literacy is a prerequisite for democracy which is considered as the best form of government. If democracy is to succeed, people have to make correct choice. Only literate public can evaluate the policies and programmes of the government. Literacy make people conscious of their rights and duties. Literacy prevents exploitation and thus contributes for economic development. Social evils like dowry and communalism can be eliminated to a greater extend. In short literacy is essential for leading a smooth and successful life.

SNOWY AND SABOR

Once upon a time there was a white tiger and a leopard in a dense forest. The tiger's name was Snowy and the leopard's name was Sabor. Snowy was so friendly and gentle to all. So he had a lot of friends in the forest. But Sabor was not ready to mingle with others. He thinks himself as the best.

One day Snowy saw Sabor crying beside a tree. Snowy asked the reason. Sabor told that his son was trapped inside a net by humans and Sabor has no friends to help him. Snowy said "Don't worry, I have many friends here. We will help you". Snowy called his friend, a mouse named Lara. Lara and her friends cut the net easily with their sharp teeth. The cub became free. Sabor thanked everyone. That day onwards Sabor mingled with all and he had good friends

Our New Venture
ATAL TINKERING LAB

'Creativity is sprouting up new things.....'

' Innovation is doing new things...'

Our ever dream project Atal Tinkering Lab (ATL) a flagship initiative of the Atal Innovation Mission of the Government of India , to inculcate an innovative mindset among the students was inaugurated in our school by Sri Rajit Karunakaran- Regional Mentor for Change (ATL).

We urge our students to make full use of the facilities to become future innovators and encourage them to be more passionate and enthusiastic in their quest for knowledge...

Butterfly Smiles

Butterflies flutter

Butterflies fly

They put a sparkle

In your eyes

Watch a butterfly

And in a short while

It gives you

A butterfly smile.

IMPORTANCE OF SPORTS

Sports is very essential for every human life which keeps them fit, fine and improves their physical strength. It has great importance in each stage of life. It also improves the personality of people. Sports keep our all organs alert and our hearts become stronger by regularly playing some kind of sports.

Sports has always been given a top priority from old ages and now a days it has become more fascinating. Due to these physical activities, blood pressure remains stable, and blood vessels remain clean. Sugar level also reduces and cholesterol comes down by to a normal level by daily activity.

Different people have different interests in sports but the action is the same in all sports. Sports is an initiative for big channels to make more capita or money day by day and the number of people is also increasing.

By playing sports even at a young age, you can also be better and free from some diseases. By playing sports, lung function also improves and becomes healthy because more oxygen is supplied. Sports also improves bone strength even in old age.

Valuable and Responsible Citizenship

Citizenship is a sense of belonging to a community for which one wears some responsibility. A good citizen imbibes many qualities. The fact that he has some duties and responsibilities to bear is true.

But, at the same time, he also enjoys some rights and privileges as a citizen of free state. He has every right to indulge in the judicial, legal, political, religious and social affairs of the nation, and has some obligatory duties of his own which is a promise by him to his nation.

He must not hurt the sentiments of others and must prevent the subjugation of majority over minority which is powerful enough to tear down the unity of the nation. Being loyal to the nation and society under all circumstances is his first and foremost duty.

A citizen becomes an effective citizen only when he is ready to sacrifice his life for the sake of his motherland. He must love his nation and he be a nationalist. He should have firm and deep faith in his motherland and abide the laws of the land.

He must respect the cultural heritage of his country and should respect the heroes, the prophets, the sages and the sense of his country and must respect the race to which he belongs. He must always keep in mind and work for the better future of his country. He must raise the standard of living of his country by working honestly during times of aggression or foreign attacks.

A good citizen should have spirit of co-operation, friendliness, humanity, dedication and devotion to his family and society. He must show respect to other faiths. He must not do anything that brings disgrace to his society or country. All these good qualities, if possessed, make us a good, valuable and responsible citizen.

JOURNEY TO SUCCESS

I am walking through a path,
which is known as 'effort';

To meet a new path after 10 miles,
which is known as 'success'

After completing a mile, I heard a
noise,

As expected, a crowd, who's
against and who disheartened me,

To 'success'

I turned around,

With a bewildered face;

Whether to continue my journey to
'success'

For a while, I thought about my
hard work,

sacrifice, perseverance;

To complete a mile of my journey,
to 'success'

After thinking for a while,

I continued my journey, to 'success'

Completed 5 miles, I found that,

There are

people, against me yet

Continued my journey to 'success', with
a thought;

'Don't give up until I succeed'

Finally, I completed 10 miles of my
journey;

Met a new path called 'success'

I found people being kind to me,
who used to discourage me;

With a thought in my mind,

'Believe in yourself,

No matter who's against, you,

Follow your dreams

And never give up until you
succeed'.

Saving the Birds

One day in spring, four men were riding on horseback along a country road. These men were lawyers, and they were going to the next town to attend a court. There had been a rain, and the ground was very soft. Water was dripping from the trees, and the grass was wet.

The four lawyers rode along one behind the other. The pathway was very narrow, and the mud on each side of it was deep. They rode slowly, talked and laughed as they were passing through a grove of small trees.

They heard a great fluttering over their heads and a feeble chirping in the grass by the road side.

“What is the matter here?” asked the first lawyer, whose name was Speed.

“Oh, it’s only some robins”, said the second lawyer whose name was Hardin. “The storm has blown two of the little ones out of the nest. They are too young to fly, and the mother bird is making a great fuss about it.”

“What a pity! They’ll lie down there in the grass, ” said the third lawyer. In a few minutes they had forgotten about the birds.

But the fourth lawyer got down from his horse and very gently took the little ones up in his big warm hands. He said, “Never mind, my little fellows. I am going to put you in your own cosy little bed.” The birds chirped softly as they knew they were safe.

We celebrated the 75th Independence day with great pomp and splendor. Retired Col. Sudhakaran Pillai K P was the chief guest of the day. Asst. director of agriculture Dr.Jomy Jacob & Agriculture Officer Shri Sumesh also graced the occasion

. In connection with Azadi Ka Amrit Mahotsav, a 'Tree Park' was launched in our premises in which 75 saplings commemorating 75 martyrs were planted. This programme was inaugurated at Raj Bhavan by our Hon'ble Governor Shri Arif Mohammad Khan by handing over a sapling to our School Pupil leader Amrita SR..

The school witnessed a number of colourful programmes including skits, dance, patriotic songs etc... A colourful rally of students also added grandeur to the show

The task of the modern educator is not to cut down jungles, but to irrigate deserts. These words remind me that I am blessed to work in this Green School, to educate the young and to serve them fruitfully.

Ours is a school which would rather be described as a 'Home of Love and A Temple of Learning.' Children of this temple will never forget the values inculcated in them by their teachers. When they enter the green campus, they really enjoy learning with fun and feel happy. Not only the children but also those who visit here feel the positive energy existing here. Children get life experience from the value-based education that they are acquire from here.

As everybody knows, successful green schools are better for students, teachers, and communities, as demonstrated through research and on-the-ground experience. The greenness of the school not only protects students' and teachers' health but also ensures a clean and healthy indoor environment.

The sufficient infrastructure also provides them the tools to solve the global challenges we face now and also in the future.

Thank you.

Grandma's Birthday Gift

Anita was a school going child. She studies in sixth standard. One fine day, when she and her friends were sitting inside the classroom, their class teacher said that all the students in the class should make a small library at your house with the books you have and then take a picture of it and send it to her.

After the school, when she came back home, she started to think “I have some books, but I don’t think that I can make a library with that, it’s only a few”. It was night and she has to sleep or else she could not wake up in the morning and go to

school. Anita went to bed but she couldn’t sleep well because all night she was thinking about the library, sending it to her teacher and all. The next day when she went to school, her teacher said, “Many of you have sent me the photo of your small library but some of you didn’t. Everyone has to send me the picture as soon as possible. ” By now Anita was a bit scared. She thought “Will my teacher scold me? How will I make the library?”

The next day was her birthday. Everyone gave her all sorts of gifts. But she was still unhappy. Then after some time her grandma came to her house. Now she was happy, but not much. Grandma had a big cover of gifts for her. “What is it, Grandma?” she asked curiously. Grandma handed the big cover to her. Anita opened the cover and what she saw was a big bundle of books. She was surprised and asked “Is this all for me?”

With a smile on her face, Grandma said “yes”. Now she ran to her room and kept all the books in her bookshelf, took a photo of it and sent it to the teacher. The next day, she was well appreciated by her teacher and friends. Now she was very happy.

A colourful event for the aspiring talents.....

Our school with great pride and vibe conducted the arts festival 'Tarang 2022' on 22 nd and 23 rd of July. The event was inaugurated by the well-known poet and lyricist Sri Pirappancode Vibhu, at the Indrapuri auditorium. It was accompanied by his inspirational speech which was a great motivation for our children. It was a good platform for our children to exhibit their talents after a prolonged gap due to the pandemic.

Nature

Everything is nature,
God gave us this future.
Birds fly in the sky
And mountains are so high
Trees are green and water is so
clean

We are not kind to it,
We are only harming it.
But it never betrays
It also give us right way.
Please live it as it is,
Don't try to play with it

6TH AUGUST HIROSHIMA DAY

Amrita Kairali Vidya Bhavan in collaboration with Japanese Cultural & Information Centre (JCIC), observed 77th anniversary of Hiroshima Day in remembrance of the martyrs of atomic bomb explosions in Hiroshima & Nagasaki.

Sri.Asok Kumar, Director-Institute of Japanese Studies, Dr.S Ratnakumar, Chairman-JCIC & Smt. Pratibha Menon, Director-JCIC were the guests of the day. Variety programmes like Japanese song, dance, skit etc were presented by our students. Even japanese dishes were presented at the function.

Devika Muraleedharan of Std XII gave a talk in Japanese language. Prizes were distributed to the winners of interschool painting & essay writing competition.

YOGA FOR HEALTH

Yoga is a great way to work on your flexibility and strength. Just about everyone can do it, too — it's not just for people who can touch their toes or want to meditate.

Some types of yoga are about relaxation. In others, you move more. Most usually types focus on learning poses, called asanas. They also include attention to breathing.

1. Yoga for Flexibility

Yoga poses work by stretching your muscles. They can help you move better and feel less stiff or tired. At any level of yoga, you'll probably start to notice benefits soon. In one study, people improved their flexibility by up to 35% after only 8 weeks of yoga.

2. Strike a Pose for Strength

Some styles of yoga, such as ashtanga and power yoga, are very physical. Practicing one of these styles will help you improve muscle tone.

But even less vigorous styles of yoga, such as Iyengar or hatha, can **provide strength and endurance benefits.**

Many of the poses, such as downward dog, upward dog, and the plank pose, build upper-body strength. The standing poses, especially if you hold them for several long breaths, build strength in your hamstrings, quadriceps, and abs. Poses that strengthen the lower back include upward dog and the chair pose..

3. Better Posture From Yoga

When you're stronger and more flexible, your posture improves. Most standing and sitting poses develop core strength, since you need your core muscles to support and maintain each pose.

With a stronger core, you're more likely to sit and stand "tall."

Yoga also helps your body awareness. That helps you notice more quickly if you're slouching or slumping, so you can adjust your posture

4. Breathing Benefits

Yoga usually involves paying attention to your breath, which can help you relax. It may also call for specific breathing techniques.

But yoga typically isn't aerobic, like running or cycling unless it's an intense type of Yoga.

You may feel less stressed and more relaxed after doing some yoga. Some yoga styles use meditation techniques that help calm the mind. Focusing on your breathing during yoga can do that, too

Yoga has also been linked to lower cholesterol and triglyceride levels, and better immune system function.

The Girl in the Rain

It was raining heavily; my friends and I were sitting inside the class room of our school. The bell rang and we all came out of the school

with our umbrellas. I need to walk till my house and it takes a while to get there. I like to do arts and crafts. On my way, I saw a craft store. At that time, I remembered that I needed some things from the store to make a few designs I had planned. I bought the things I wanted and started walking back to my home.

While I was walking, I saw a little girl who was walking in the rain without an umbrella. I called the girl and asked “Where is your umbrella or raincoat?” She said that she doesn’t have an umbrella or anything which keeps her safe from the rain. At that time, I thought of an idea. I knew how to make an umbrella with cardboard, plastic bags and a stick.

I arranged the cardboard pieces into the shape of an umbrella and the stick as the handle. I kept the plastic bags on top of the shape to keep the structure and the girl dry. The girl thanked me by holding the umbrella which I made for her. I said bye to the girl and went back to my home

The rain stopped. The next day was a holiday. I was bored of sitting in my house from morning. I asked my mother whether I can go out and play, and she agreed. So, I was walking on the side of the road near my house. There were many rocks in the roadside. But I didn't see it. I slipped on a rock and fell into a ditch. The girl to whom I made the umbrella saw me falling and rescued me out of the ditch. I thanked the girl and we became friends forever.

Remembering Hiroshima

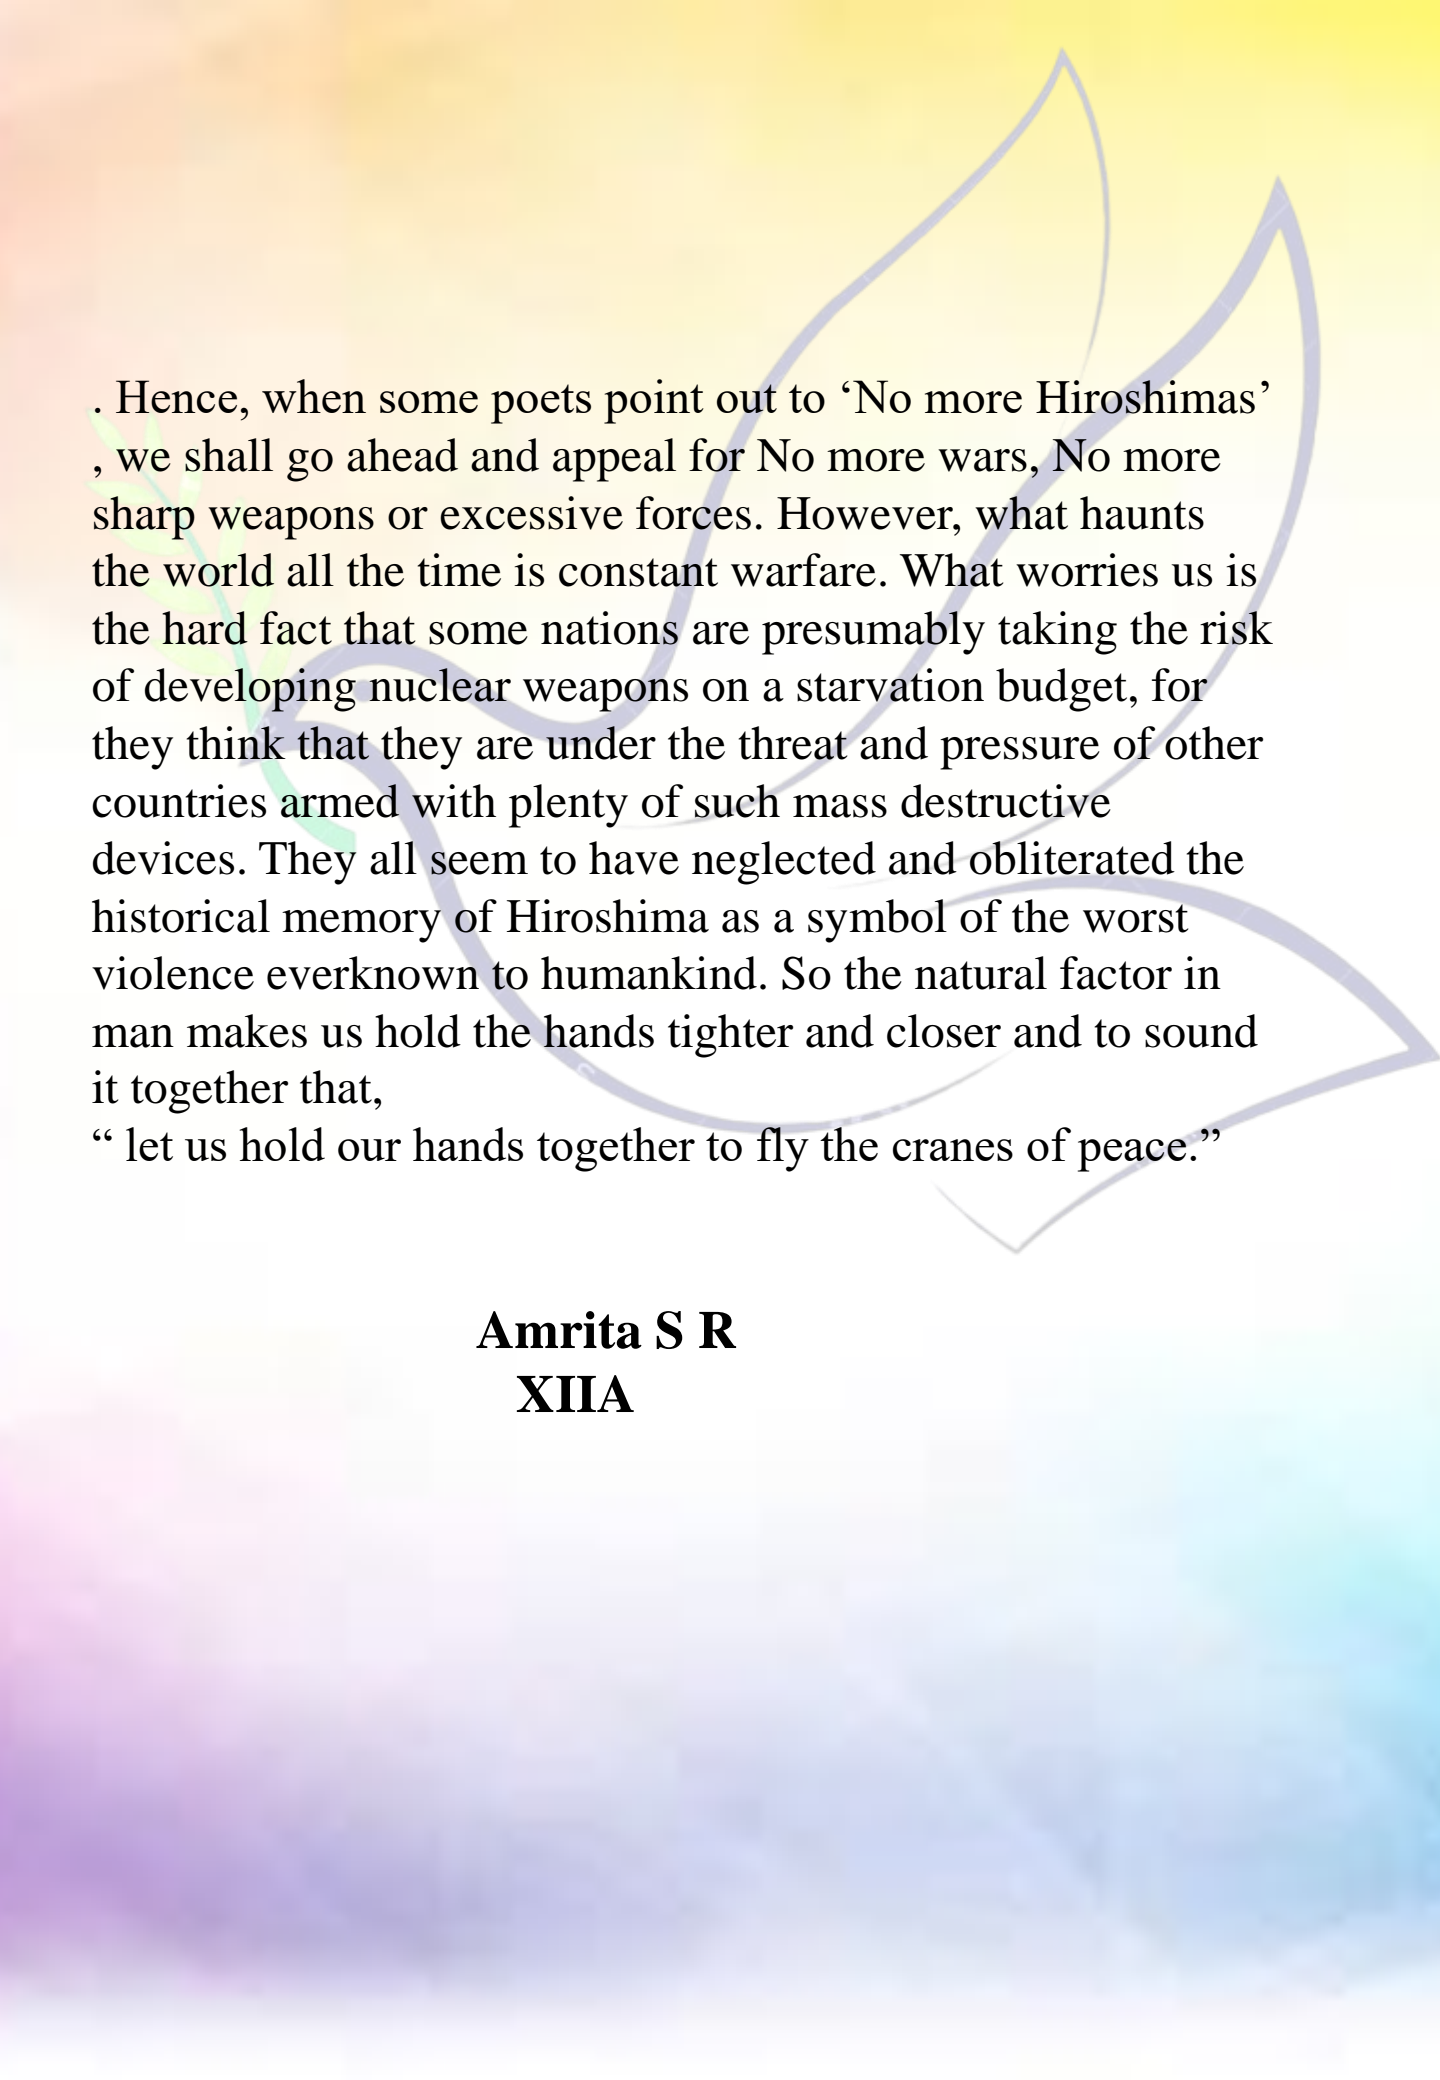

“Let’s fight a war to end all the wars
Let us together make a world, without war and with
hope...”

No doubt war is an evil, the greatest catastrophe that befalls human beings. One has only to look back to the havoc that was wrought in various countries not many years ago. Modern wars are that ‘killers’ which can even engulf the entire world. It seems much futile to talk of permanent and everlasting peace or to establish eternal peace

In spite of all that mentioned theories, weapons have always been used, military force has always been employed, clashes of arms have been occurred. So war is totally ‘blushed’ by the nations. But when and only when the nations come to know that peace is the only way to the stoppage of ‘paused’ lives. Its not less than a golden ticket to enter a new and bright future for mankind. This is that moment, the flag beholders come to turn their eyes to the incident that burnt over the human hearts, of Hiroshima and Nagasaki. ‘The silent little boy’ and the uninvited ‘Fat boy’ burned the lives beyond audits.

So terrifying even to sound now to memorise the lives of thousands of innocent people who died immediately from the bombings and thousands of people dying each year from its after effects. This gives the universal fact, that in the history of mankind, one will find no desire which is older and stronger than the desire for a world without wars. Upon the close analysis of killer bombings to splash blood from the heart of Hiroshima and Nagasaki, the two pieces are not bound only by a common overall happening of nuclear war but shares the same underlying conclusion of 'No more Hiroshima's'.

Lives were scorned under blasts and trapped under buildings which portrayed all the visions to the unconditional surrender by the Japanese emperor at the end. The cold hard fact is that Japan started the war and just ended it. So when it comes to rethinking the Hiroshima, a bombing and its historical impact, echoes the words that worth it. "I will write peace on your wings and you will fly all over the world" from the little throat of Sadako Sasaki proceeding the life giving to her: origami paper cranes, the unborn-living messengers of peace. This history arises a number of approaches to be exercised from different perspectives related to the human conditions. Philosophical ponderings on this 'blindwar' characterized factual inquiry or empirical wisdom. This is deplorably sentimental and unforgettable with regard to the deadliest mode of warfare that has ever occurred in human history. The philosophical pondering from some poetic viewpoints is thought provoking and instructive with ongoing relevance to the problematic globe

. Hence, when some poets point out to ‘No more Hiroshimas’ , we shall go ahead and appeal for No more wars, No more sharp weapons or excessive forces. However, what haunts the world all the time is constant warfare. What worries us is the hard fact that some nations are presumably taking the risk of developing nuclear weapons on a starvation budget, for they think that they are under the threat and pressure of other countries armed with plenty of such mass destructive devices. They all seem to have neglected and obliterated the historical memory of Hiroshima as a symbol of the worst violence everknown to humankind. So the natural factor in man makes us hold the hands tighter and closer and to sound it together that,
“ let us hold our hands together to fly the cranes of peace.”

Amrita S R
XIIA

**Happiness is travelling
with school buddies.....**

School days should be the happiest time in a young person's life. What do you think about it? We step out of the school carrying abounding memories with us. One of those cherishing memories is our school trip..

School trips leave a great impact in our minds, where we go without our family, our friends , which allows us to rely on ourselves and take responsibility and to be fond of the amusing activities of the

trip. It's great to enjoy a little bit away from school and home for rejuvenating our mind and this is exactly what happened. After working hard and excelling in school, we were able to go out on an unforgettable trip.

It was a three days and two night trip. We had many destinations to visit, they were Guna cave, piller rock, pine valley, suicide point, Kodaikanal lake, Cumbam Theni-vineyard and Parundanpara

We all prepared our luggage bags and small bags with snacks eventhough it

was being provided inside the bus. We departed from the school at 5am. The bus driver turned on the lazer lights and played music's It was something that we

got to experience again after a very long two years of pandemic, still we had that same feeling, same enthusiasm and also felt so energetic. The moment the music started playing , we all started dancing with our dearest teachers. By 10.15 am we gathered together for our breakfast

Around 11.30 we crossed Tamil Nādu-Kerala border. We enjoyed by having juices and snacks in the bus, watching movies and also a slight nap. It was around 3 when we had our lunch and two or hours left to reach our destination. The more closer we get, the more we excited. As the time went by, it started getting extreme cold and began

getting worse as our sweaters were inside the luggage

At last, after the twelve hours ride we reached our ever dreamed destination. We got our rooms and we four shared one room. On the other hand boys were allotted to stay in one room. After getting fresh we all joined for our dinner. After having dinner we returned to our rooms and had a chit-chat with our friends followed bidding goodnight to all. That was the end of our first day.

Next morning, we were ready to continue our second day journey with extreme happiness. First destination point was to 'Pillar Rock', we enjoyed the view over there, and got a photographer there to have a shot. Then we left to our next location 'Pine Valley' which was fully covered with huge pines. Also got a wonderful chance to have a horse ride.

After spending some time there we left to 'Guna cave'. But unfortunately it was closed for some reason. Even though it was so, we were able to have a walk through it.

We visited the suicide point also. It was so terrifying. Later we enjoyed some shopping experience. Around 4 pm we reached Kodaikanal lake and there we enjoyed bicycle ride and boating. By 6.15 we all were allowed to go back to our respective rooms and asked to assemble for the campfire. It was the most cherishing and thrilling

experience because we together with our teachers enjoyed by dancing and singing. To be honest it was the best time ever we all spent together. After having dinner we went back to our rooms and thereby the second day came to an end. The day had arrived, the last day of our trip. All of us were sad about it, we didn't want to leave the place. We began our last day trip by 5 am and on the way we visited Theni vineyard. It was a delightful experience.

People often say that “ The moment you enjoy the most , the time passes by quickly”. By 9.30 pm we stopped near a hotel for having dinner and only three more hours left to reach our school campus. At 12.30 we reached school , met our parents and

without delay shared our wonder moments with them. Now, it's all just a memory

‘ Travelling with our friends is one of the best experiences one can share together’
